# National Geographic Readers: Cheetahs

## **Synopsis**

Adorably cute and amazingly fast, the cheetah is a perennial favorite among kids. This National Geographic Reader will delight kids with beautiful photographs and mind-boggling facts about this majestic and mysterious cat. Did you know a cheetah can go from 0 to 60 mph in less than 3 seconds? True to the National Geographic Kids™ style and trusted reputation, snack size bites of information provide easily digestible learning that fulfills both the reader's curiosity and sense of achievement. National Geographic supports K-12 educators with ELA Common Core Resources. Visit [www.natgeoed.org/commoncore](http://www.natgeoed.org/commoncore) for more information.

Age Range: 6 - 9 years

Grade Level: 1 - 4

## **Customer Reviews**

LAURA MARSH is a long time contributor to National Geographic Children Books. She has written a large number of books in National Geographic Readers series and also in Mama Mirabelle and Toot and Puddle series.

National Geographic Kids books are great. The illustrations and photographs are amazing and the information they provide is set up in a way that keeps your children engaged and interested. They

have small paragraphs and pop out boxes of facts over beautiful photographs and illustrations, instead of just a boring block of text. My girls love them and we have amassed quite a collection. This particular book is about Cheetahs. They talk about many things including the differences between cheetahs and other wild cats, their speed, where they live, baby cheetah cubs, and even how to protect them from extinction. My 6 year old loves learning the facts and reading the books while my 3 year old loves the pictures, especially the baby pictures. My 6 year old has been really interested in these types of educational books lately and has been asking for more, which we are happy to encourage. We have purchased many of the National Geographic Kids books for our collection and they are a big hit in our house. There are so many different books with various subjects that will appeal to any kid. These are highly recommended. If you haven't already, do your kids a favor and start their collection today.

My 2 year old LOVES this entire series of Nat. Geo Readers... I have purchased about 25 different titles, "pre-readers" as well as Level 1 & 2 readers. She loves them all & will ask for certain ones. The "pre-readers" level books are extremely simple & great because she memorizes the words & can "read" it herself. We love the more advanced ones too, because there is more information to talk about. I have learned quite a few facts, myself!) What a great series. The price is reasonable & pictures are great. These are really getting her interested in nature, animals & science... I will continue to buy these as they are released, for our collection!

I purchased this book along with the Aurora World Miyoni Cheetah Cub Plush for my six year old niece:Â Aurora World Miyoni Cheetah Cub PlushThe book complemented the stuffed animal perfectly for a child who asked for a Cheetah Cub for her birthday. The National Geographic Kids books are AWESOME! Each page has many colored photographs and the information is accurate and engaging. My niece loved the book just as much as the stuffed plush.

I ordered this book for a second grade research project. The students were able to gather most of the information they needed from this one book. It contains wonderful, vivid photographs. If you are a primary grade teacher, the National Geographic Readers are perfect for teaching nonfiction text elements along with nonfiction reading comprehension (Common Core ELA Standards). Parents and children will enjoy these engaging books at home, too. They are interesting and informative.

If your child has to the poster or report on a certain animal this entire line is exactly what you need.

Great pictures and great facts perfect for anyone up to 12 years old to use for a project.

Bought two books by Laura March in the National Geographic series: Cheetahs and Wolves Level 2 for a five-year old. He absolutely loves them. They are perfect.

One of the granddaughters, age 3, has a collection and is crazy about cheetahs. After we read this book, the older granddaughter had to point out that her sister's collection probably contains more leopards, not cheetahs. Very informative book for little ones and grandmas too. The six-year-old really loved the "punny" riddles interspersed on the pages. But they did lose interest before we got to the final couple pages.

perfect for my 5 yo daughter who loves cheetahs educational with great photos!!
