Fun for adults or kids. Not an overly difficult coloring book so it doesn't take forever to finish a design. But when you are done the optical illusions are very cool. It makes me a little dizzy to look at some of them. The pages are double sided so wax crayons, wax pastels or color pencils work better than markers. We like the wax pastels because the color is richer than crayons or pencils. A very relaxing way to pass the time. Can be done while watching TV, or if you want to escape for awhile into a world of illusions.

3rd grade level.

The designs are excellent, however..... I'm very disappointed to find that they are printed on both sides of each page. I prefer markers to crayons or pencils. Even the pastel markers show from the other side. Even colored pencils will have to be used with a very light hand. Since I bought four of design books printed on both sides of each page, I guess I'm going to have to either skip designs if I use markers, or get used to colored pencils.

I love coloring with my elementary-aged boys, and these are fun for both my 5 and 9-year-olds. We chose the more simple designs for my younger son, and I teach him about making patterns. They are also great for improving fine motor control. We love sharing our finished designs and patterns with each other!

This book is lots of fun to color. There are a lot of different designs. Some are complicated and take more time. Some are easy to finish in an hour or so.

I bought this for my mother as a gift, she said she really likes the pictures in the book, but hates that the pages are double sided.

wish the pages were not front and back

Got these for my adult daughter as a stress release. She loves it, said that it really does help to de-stress after work.
