Robert N. Anthony is the Ross Graham Walker Professor Emeritus of Management Control at Harvard Business School. Professor Anthony has been a director of Carborundum Company and Warnaco, Inc., both Fortune 500 companies; for 25 years he has been a trustee of Colby College, including five years as chairman of the board. He has consulted for many companies and government agencies, including General Motors Corp., AT&T, the General Accounting Office, and the Cost Accounting Standards Board. Among Professor Anthony's awards are the Distinguished Accounting Educator of the Year Award from AAA, Accounting Educator of the Year Award from Beta Alpha Psi, the Meritorious Service Award from the Executive Office of the President, the Distinguished Public Service Medal of the Department of Defense, Comptroller General's Award of the U.S. General Accounting Office and Distinguished Service Award of the Harvard Business School Association.

Excelent reference for beginners in management, like me. I found the text easy to understand, with good language and examples.

This book was exactly what I needed to get me through my Non-profit organization's course. Even though is copywrite is 1999, the concepts were still applicable.

this book is one for your library. i used in my management class and i still refer back to after graduation.

I am not a manager, my business card says I am a scientist, but I ended up being the director of a large set of molecular biology core facilities within a nonprofit academic institution. A faculty member I was collaborating with had this book fall out of his bag in my office. Before I was able to get it back to him I read the first chapter then bought it online. This was back in 2001 and it has helped me ever since. Research Admin borrowed it for a couple of years but it showed back up in the mail since I stamped my name in it. Most useful: when administration said, "no, you cannot do that, NIH guidelines say that is forbidden", I could sometimes find a kernel of information in this book that instead showed that NIH did allow it. There are buzzwords worth knowing, "institutional offset", but they are clearly explained so when someone uses the buzzword you can go all Inigo Montoya on them. "You Keep Using That Word, I Do Not Think It Means What You Think It Means." This is an accounting book for non profits. I would have thought it would be the most boring book I ever cracked. Quite the opposite. The case studies are actually pretty entertaining and you might find one that is a mirror image of the big problem you have today.

The book is very comprehensive and uses very good learning methodology. One can find all that is important in the area of management control. I can highly recomend the book to anyone interested in this field looking for a methodological guide to management control.
