Customer Reviews

Great music!

Although a bit targeted at female audiences, I found this a very enjoyable read. Possibly as I am a pianist and old enough to appreciate her immense accomplishments.

Love it~

I read another review that stated something about the key that the sheet music was written in. It's true that the recordings are completely different keys. Other than that the book is ok.

Okay maybe I'm being harsh here but I purchased the book in late 2014 and I'm very much a beginner and self-teaching myself but I have managed to muddle through a couple of songs quite

nicely. That being said, I began to move on to "I feel the Earth Move!" and all I can say is the song as written sounds nothing whatsoever like the original. I've played it over and over on youtube and there is no way this version can be played to sound anything close to the way the song was meant to be played. It appears to be written in the key of "E" rather than "C" and it is impossible to make it through the arrangement without being totally frustrated and I am extremely disappointed that it was not properly assigned the proper key. Hal Leonard needs to correct this.

I am enjoying playing from this book

Enjoying playing these songs. Always like Hal Leonard arrangements.

probably better for piano than guitar
