Customer Reviews

Great music to learn. CD was defective.

This is an excellent Bass book and playalong CD Both Notation and TAB are provided so any level of player could benefit from this release. As far as I can tell so far the transcriptions are accurate, which is worth the money alone. Also 's delivery service was excellent.

Music great but recordings are soulless better to follow originals nice to have more songs but these are all easy classics

I love it because am able to get all the right notes to these songs big up one love jah jah

great piece

This book is for the advanced student but you can go at it at your own pace just as I do. Maybe in a year or two when I get better, I just may give this book a five star rating. This is true for any play along book for any music type. Any Bass builders or any builder book series are outstanding for beginners of any music. You cant go wrong...period....buy the books

Fun songs to learn but they get monotonous pretty quickly. The series is excellent, though, just pick another to start and come back to this later.
