Love the book

I bought this book for my grandson so we could use this as a reference guide to purchase the different chima characters. Well, it is a cool book, but Lego doesn't make these anymore. Some can be found (used or overpriced). So, this is the reason for only one star.

We sent this to our 8-year-old grandson for his birthday. It was the first gift he opened, and his parents said it might as well have been his only gift! He loves it, and spent a lot of time reading it

even at his party.

My son's words:I like how it shows all the guys. I like how it comes with a guy. I like how it shows the vehicles. I like it because it doesn't get boring after a while.

It is not what i expected, i wanted to learn about the Chima world, i know a little more but not all of it, good product anyway.

Just like all of the Lego encyclopedias and dictionaries, this is another great book that any child (or adult) interested in Chima will enjoy

Love this book! Entertained for hours on a road trip with all the characters in it and sets available in the back of the book! Sure hit for lego lovers!!

Lots of info in it like a library book
