College. Gary's avocation is writing. He has authored three text books in respiratory care and is currently working on a manuscript for his fourth title.

Required textbook. Excellent condition

This was a very bad deal, most of the pages with the competencies are torn out. I haven't had time to deal with this, but I'm very upset! This was a very bad deal!! I would like my money back!

The information in this book is usable but because all of the clinical assessments had been used this book isn't useful for my class. I was disappointed to see that due to it said slight writing in book. I am going to keep the product due to a refund and timing is a hassle.

The book itself was fine; great for studying and such. But I rented this from and it was missing A LOT of pages. Crucial pages! Whoever had this before just tore them out! I had to keep asking my classmates to share with me when the book came to a dead end.

Bought for my grand-daughter's Respiratory Therapy studies. This was what she needed for her class.

Just as promised!

Received my lab manual in less than a week after ordering! Informative and technical for your hands on learning in lab.

Good book in good condition
