Baby Animals Black And White

Synopsis

This captivating board book features the striking black-and-white faces of eight adorable baby animals. Research has shown that infants respond more readily to black and white images, making this book an ideal choice for the very young.

I am so thrilled that this book has been the very first book of so many newborn babies. It is never too early to introduce babies to books. I am told it can be shared with an infant as early as two weeks old. Parents and grandparents have sent me many photos of infants enthralled with the baby animal faces. I have created two more black and white board books for babies: Baby Animals Spots and Stripes and Baby Animals Day and Night. In all three books the black and white images will help stimulate the new brains of infants and entertain the minds of older babies. There is always a full color spread of human babies in each book, mirroring the theme presented.

Overall the book looks really cute and I think that my daughter is really going to like this. However,

when it was delivered there was some sticky smudges on the cover. Not sure if this was shipped this way or if it happened on the way, but either way it's not something that you want in a brand new product for your baby. It looks like it will easily wash off, but just a little gross.. The quality of the book other than that is good. It looks to be unused and there's nothing funky going on in any of the inside pages, hence the reason that I only docked it one star.

I bought this book before my daughter was born because I know babies love black and white pics at an early age. We have a Dalmatian so she loves the cover. She is 18 months and still loves this book. Now I say, what sound does this animal make? And she says "baa" for the sheep pic. Too cute!! Glad I bought it!!

The best few dollars I've ever spent! I bought this for my son when he was just a few weeks old. Those first few weeks are rough, since newborns can't really focus their eyes on much. Once he was able to start focusing on things, he really enjoyed this book! No, there aren't any words in it, and it is only 10 pages, and 8 are animal faces. They aren't super simple images compared to the Look Look book. They are a bit more detailed. I liked setting up the book in his pack n play so he could look at it. And I'd also flip through the pages for him and tell him what the animals are, or make animal sounds for him.

Very cute book full of beautiful black and white prints of adorable animals! My daughter loves to look at it and now that I'm reading to her everyday she still loves to look at these pictures and hear my stories about each animal!

These were such a hit with our 8 week old. He responded immediately to the images, which really stimulated his curiosity and interaction. Cooing, kicking and gurgling. Very well made, durable books. Highly recommend!

I started showing this book to my baby when she was 6 weeks old (she is 7 weeks old, so it's only been a week), and she appears to really like it. It keeps her attention (but not for as long as some reviewers state; every baby is different). She smiles and coos while looking at it.

Our baby girl was 3 weeks old when we introduced this book series to her. It was so cool to see her actually focus on the book! It is easy to hold and turn the pages, even while breastfeeding. The

book is lightweight and very strong. I would definitely recommend the series for babies under 3 months but I have a feeling our daughter will like these even when she her vision improves. Great pictures and easy reading! I'm thankful books of this quality exist as most we came across were too advanced and larger so it made it more difficult to read and hold her at the same time.

This book is really cute. I don't know just how much it engages my son but he did reach out for the book when I flipped the pages. There are several pictures. A panda, seal, rabbit, zebra, cat, dog, cow, sheep, and ends with a color picture of a baby reaching for a mobile that has each of the animals in the book on it. Know that this book is solely a picture book. There are no words. The pictures are very detailed and crisp, far more...complex I guess... than the pictures in Look Look which has very simple pictures.. Worth the \$3.37. Don't think I would had paid the full \$5.95 for it though.
