Surgical Mayo Setups, Spiral Bound Version

Synopsis

Whether you're an experienced surgical technologist, or operating room personnel or just starting out in the field, SURGICAL MAYO SETUPS, 2nd Edition is the reliable, detailed resource you need for success in any operating room! Newly revised with more than 130 Mayo-stand and back-table setups, this handy pocket reference is smartly organized with tabs according to surgical specialty, which helps you find the right set-up quickly and easily. A new introductory section on setup methods provides variations and photos for reference depending on specialty, procedure, facility, OR layout and personal preference. Each of the 12 surgery sections includes a brief overview, key considerations, and an alphabetical procedure list, along with a detailed guide to the instruments and equipment required for the procedure. Selected illustrations throughout the guide show the general Mayo-stand and back-table setup for more complicated procedures--to increase your confidence as your experience grows.

Tammy Allhoff is a Certified Surgical Technologist and Certified Surgical First Assistant. An

instructor and the Clinical Coordinator for the Surgical Technology Program at Pearl River Community College, she has more than 16 years of experience in education, and is active with the Association of Surgical Technologists. Ms. Allhoff's professional experience includes being part of the first open heart team in Hattiesburg, and a C.S.T., C.F.A. for general, thoracic, and vascular surgeons. She later specialized in peripheral vascular surgery and worked as a Certified First Assistant. Ms. Allhoff holds an Associate's Degree in Applied Science and co-authored "Surgical Instruments" with Debbie Hinton.Debbie Hinton is a Certified Surgical Technologist specializing in orthopedic and neurological procedures. She is currently an instructor and the Program Director for the Surgical Technology Program at Pearl River Community College in Hattiesburg, Mississippi. Co-author of "Surgical Instruments," a series of computer learning programs on surgical instrument trays, Ms. Hinton holds a Bachelor of Science in education, and is an active member of the Association of Surgical Technologists.

I was very disappointed with this book from the moment I turned the first page. I had hoped that the 2nd addition would have corrected all the problems within the 1st addition. Photos are only for General Surgery Set up and OB/GYN and they are in B & W. For the cost of this "reference guide" I had hoped for color photos for ALL set ups. Read the reviews for the 1st addition....this book is exactly the same. Received it today....sending it back tomorrow!!

A+ great seller

useful

It was a good book

great book but it really needs more detailed images

just what I needed

Love this book, very helpful while being in clinicals!

Actually hoping for more pictures. Location of instruments, how many for each procedures, etc. Not really what I expected and disappointed . Too bad.
