National Geographic Readers: Weird Sea Creatures

Synopsis

Did you know that the deep-sea anglerfish has a glowing fishing rod attached to its body, or that the barreleye fish has a see-through head? See these wacky creatures and more in this brilliantly illustrated book that explores the strangest creatures under the sea. This level two reader uses easy-to-grasp language that will keep children intrigued and learning on every page. This high-interest, educationally vetted series of beginning readers features the magnificent images of National Geographic, accompanied by texts written by experienced, skilled children's book authors. The inside back cover of the paperback edition is an interactive feature based upon the book. Level 1 books reinforce the content of the book with a kinesthetic learning activity. In Level 2 books readers complete a Cloze letter, or fun fill-in, with vocabulary words. Releases simultaneously in Reinforced Library Binding: 978-1-4263-1048-5 , \$13.90/\$15.95 Can

Grade Level: Kindergarten - 3

Customer Reviews

LAURA MARSH is a long time contributor to National Geographic Children Books. She has written a large number of books in National Geographic Readers series and also in Mama Mirabelle and Toot and Puddle series.

My 7 year old loves sea creatures so when I saw this book it was a must buy. He loved the book, it is easy enough for a kindergartner or 1st grader to read but also includes fun facts so my older kids equally enjoyed the book! I am a big fan of all the National Geographic kids book, I highly recommend for parents of kids that want to learn about animals.

As usual, an outstanding Nat Geo Kids book! I love that throughout their fabulous animal series a lot of animals overlap. I teach grade 2, and my students will see/read something that they've seen in another book and absolutely freak out. They'll then bring the 2 books side by side and compare the info. on the animal in each one.

I got this for my 10-year-old daughter who is interested in all animals. Living right in the middle of the country, we especially like to learn about sea creatures because our chances of actually seeing any are slim. This is a really great little book with some really neat pictures. Although I disagree with some of the politics National Geographic seems to sneak into their publications from time to time, this one was pretty neutral. My daughter has read it over and over and loves to show me the pictures and read to me interesting facts about all the fishies.

I love these books. I'm constantly looking for interesting nonfiction texts for my classroom. These are perfect for my third graders and they can not get enough of them. Kids are constantly coming up to me and telling me new facts that they have learned from the books in this series. Great for science, reading, social studies, history, vocabulary, etc. Highly recommended!

I bought this book for my 4 year old son and he loves it. Great pics with interesting information mixed in.

Beautiful pictures! I use this as a read aloud to my Kindergarten students. They love the photographs!!

smaller than I realize, despite reading the size in inches. But it was very cool!

My son loves this book, he is 7 and kept bringing it home from school to read again so we finally bought it!
