Customer Reviews

Anthony J. Trevor, PhD Professor Emeritus of Pharmacology and Toxicology Department of Cellular & Molecular Pharmacology University of California, San Francisco San Francisco, CA Bertram G.

Katzung, MD, PhD Professor Emeritus of Pharmacology Department of Cellular & Molecular Pharmacology University of California, San Francisco San Francisco, CA Susan B. Masters, PhD Professor and Academy Chair of Pharmacology Education Department of Cellular & Molecular Pharmacology University of California, San Francisco San Francisco, CA

I'm a 2nd year med student and bought this book because my pharm lectures seemed pretty low yield and often confusing. I was looking for something that would present me with all the information I needed in a readily digestible form. This book is amazing. It has pretty much all the information that's essential to know, it's well organized, and it does all that in only a few pages per class. To top it off, it includes questions that test your comprehension at the end of the chapter with FULL explanations. Highly recommend.

I'm missing pages 154-186! Chapters 16-19. Kinda odd. They haven't been removed. The book was brand new. They're just not in there. I'm not sure if this is every book or just mine, but be forewarned of the possibility. I'll contact the publisher and if I get a favorable solution I will upgrade my rating.

Helpful practice / review questions.

It's covers everything you need to know in medical pharmacology in just enough detail, not too much or not too little. I would really love it if there were more than 10 questions at the end of each chapter!!!!!!

I love this book, it is very concise and clear with key concepts. This should be a supplemental education book and not be the entirety of your pharm knowledge if you're a med student. I think that it is particularly nice to review toward the end of the year and right before block exams because once you've learned the information this is a quick reinforcement. Regarding my comment on this book being supplemental, I have the Basic and Clinical Pharmacology textbook as well and I find myself using the Exam and Board Review book much more often. For the price it is so worth it to own!

I would recommend this as a secondary resource to PharmCards. The presentation of information is too brief (duh, it's a review book) and in a strange order. Mostly, I just used the questions and practice exams to solidify knowledge gained from other sources.

This is a great book to go along with the Katzung, Masters, and Trevor Basic & Clinical Pharmacology (12th edition) book. It summarizes the chapters from the Pharmacology book and has questions that review each chapter. Our teacher uses this book as a source from some of our examination questions. Plus, it is a great review for the nurse practitioner examination.

This book has a wealth of review questions for going over the Pharmacology concepts. The questions were straightforward and the explanations included both reasons why the correct answer was correct and why the other options were incorrect.
