Customer Reviews

Denise has pulled together an abundance of complex biomedical information and presented it in an easy to understand manner. -- David Quig, PhD, Clinical ConsultantDenise's advice has changed our family forever. Her insights and understanding of the principles of health are tremendous. -- J. Nolan, parentDenise's research will likely change the terrain in treating this condition naturally. -- Stephen Levine, PhDFilled with valuable references, this book is a priority read for both parents and clinicians. -- David P. Traver, M.D. FMPReaders will find her text-written with the passion of a fiercely determined mother-to be a source of help and inspiration. -- Sheila Rogers, MS, author of Tics and Tourette's: Breakthrough Discoveries in Natural Treatments

Good book with stories of encouragement for parents dealing with a child with tourettes.

Recommended read!

the author recommends a number of "treatments" that have no research basis. These proposed "treatments" are recommended by lay persons for anything from asthma to autism to ADHD and now Tourette's. I do not recommend this book, although having your child eat all healthy, organic foods and live in a low-allergy house may be good for him/her in ways that have nothing to do with

Tourettes.

I bought this book to help my 6 year old son with Tourettes, and so far, it has been the book with the most information. It gave me lots of things to try, in order to help my son. I would definitely recommend this book to a parent with a child with TS.

Very Informative, answered a lot of my questions
