Shipping Weight: 1.4 pounds

Average Customer Review: 5.0 out of 5 stars 2 customer reviews

Best Sellers Rank: #812,252 in Books (See Top 100 in Books) #76 in Books > Arts & Photography > Photography & Video > Aerial

## Customer Reviews

Thick 8vo.

This covers the history of aerial photography. A very readable, very well written, history of aerial photography by the very man who was the leader in developing new technology for military and civilian aerial photography well into the space age. The strip camera he developed was extremely crucial during the Cuban Missile Crisis. This is a must read for anyone interested in aerial photography, civilian and military. Some of the experiences he describes were turning points in world history.

An entertainingly written story of a mere private who rose to brigadier general founding American aerial photography and his fascinating adventures in growing it from 1917 till the end of a very full and fortunately for all Americans, and its Allies, very long life. Highly recommended.
