Working With Clay

Synopsis

Susan Peterson, one of the world's foremost authorities and educators in the field of ceramics, and author of the classic master course, *The Craft and Art of Clay*, has thoroughly revised and updated her introductory course in ceramics, *Working with Clay*. Beautifully illustrated with full-color photographs, *Working with Clay* guides readers step-by-step through the creation of an object in clay. Peterson offers advice informed by years of experience in the teaching and creating of ceramics. From hand-building to wheel-throwing, decorating to firing in a kiln, the author details the process, with beautiful, full-color photographs accompanying each step.

Susan Peterson is Professor Emeritus of Ceramics at Hunter College at the City University of New York. In 1997 she was awarded the Lifetime Achievement Award from the National Ceramic

Education Council of America.

This is not your every day coffee table book, this is a teachers guide book or for someone that wants to learn how to through on the potters wheel. Very good at step by step instructions.

For a text book, this book it pretty nice. I bought it for a ceramics class I was taking at art school. I didn't read all of it during that course but it is one of the few text books that I kept so that I could finish reading later. The hard cover is nice and came in great condition. If you're interested in ceramics it is a pretty easy and educational read.

This was the required textbook for an intro to ceramics course. I loved to look at the beautiful pictures. There were many techniques listed in a step-by-step manner. We used it in class. I've seen ones with a spiral binding that would make that much easier. Overall, a fantastic purchase.

This book was in the excellent condition, as stated. However, it wasn't received in the time the seller said it would be.
