David Pogue, Yale '85, is the weekly personal-technology columnist for the New York Times and an Emmy award-winning tech correspondent for CBS News. His funny tech videos appear weekly on CNBC. And with 3 million books in print, he is also one of the world's bestselling how-to authors. In

1999, he launched his own series of amusing, practical, and user-friendly computer books called Missing Manuals, which now includes 100 titles. Aaron Miller is a part-time lawyer, part-time professor, and runs a software company serving nonprofit organizations. In all of his spare time, he authors the blog "Unlocking iMovie" (www.unlockingimovie.com), his own little way of trying to make the Mac world a better place.

These books are great-- well written, clear, easy to understand, not afraid to poke fun at the weaknesses of iMovie. The creative layout and abundant cross referencing makes it easy to find the information you want. I keep this beside me as an all around good tech support who never puts me on hold or refers me to somebody else and then disconnects me so that I have to start all over from the beginning.

Useful guide for copying VHS tapes to DVDs.

The manual that should have come with the software!

Page's books are the easiest to follow to learn about Apple products

Excellent overview of the iMovie software on both the MAC and IOS devices. Gives clear explanation on how to use various features to build movies.

Still reading. Good book.

My husband says these manuals are the best!

Without a guide like this one I find it difficult to use this software, unlike most of Apple software. And I was pretty good working with the older software. This book is very helpful. Essential is the better word.
