"Need a dictionary of avian calls? This recording is for you." Dallas Morning News

Roger Tory Peterson, one of the world's greatest naturalists, received every major award for ornithology, natural science, and conservation as well as numerous honorary degrees, medals, and citations, including the Presidential Medal of Freedom. The Peterson Identification System has been called the greatest invention since binoculars. These editions include updated material by Michael O'Brien, Paul Lehman, Bill Thompson III, Michael DiGiorgio, Larry Rosche, and Jeffrey A. Gordon.

A wonderful CD to accompany the Field Guide or just to enjoy the bird songs. It is a great gift that I received over ten years ago and I have used the Bird Songs CD many, many times with the Field Guide and binoculars to identify the birds in my yard and neighborhood. I recently bought this CD as a gift to my sister in PA. She, too, loves it. The narrator clearly announces each bird's name before the bird song is heard. The audio is excellent and more than one bird song/call is presented if the

bird has multiple calls. Educational and enjoyable!

Bird watching is so much more enjoyable now that I've learned many songs and calls. I can ID 20 birds just walking through the woods without seeing any of them. I hear a 'good' bird and then can track it down with the binocs.

My new CD stays in my car along with the booklet to tell which track has which birds. Track 21 plays both Fish Crow and American Crow - the different sounds are very clear - so I feel more comfortable in identification. I know this will help with more birds in the future too!

Great to listen to in the car- already added a few birds to my short list. It is worthwhile for sure.

excellent....even had the small dog woofing and looking for birds....

Simply the best CD out there. So well done to help you remember the bird and its song.

There are plenty of bird songs available on the CD. However, it's difficult to zero in on one bird song. You have to hunt up the category and listen through the songs until you get to the one you want. and the cd bird list isn't always readily available. I guess it's more for home use and not for birding out in the field.

The best way to learn to identify birds is from their calls and songs - especially when the sweet little things are hiding behind leaves in trees. Great variety of bird noises to learn about them - gives time to repeat the sounds between each bird to practice.
