## Customer Reviews

I love the clear lessons, self-directed learning and supplemental materials available.

good

The Saxon Teacher is a lifesaver. No internet connection is needed. Just pop in the cd and have your student watch the lesson. All problems in the book are available for your students to follow along and not just get the answers but see how to solve the math problem to get the answer. No typing or computer quizzes, they are just CDs that go into your computer. Both of my children say it's easy to follow. After they complete a test, if they get any answers wrong, I have them go through those test problems with the c. They write out the problem as shown on the screen, it helps see how to get it right. It saves me time and gives them someone else to listen to and watch how math problems can be done. It allows me to give my children solid and sound math with out the individual one-on-one and I don't have to compromise what they are learning to get it like with other computer

math programs!
