Terry Des Jardins, M.Ed, RRT is Professor Emeritus in the Department of Respiratory Care at Parkland College in Champaign, IL where he taught for 35 years. He still actively lectures third year medical students on clinical manifestations and assessment of respiratory disease and cardiopulmonary physiology at the University of Illinois College of Medicine at UrbanChampaign.

Okay all of you aspiring RTs - you need this text. You're in college, so you need to save money. Used books are, of course, the way to go...The difficult part is finding a good price from a reputable seller - that's where shines: Check the reviews.My copy was in better condition than I had expected, at a great price and it was shipped fast, so, you might want to check this seller's inventory next time you're looking for books...

The explanations and details have been simplified for easy digestion in an intro course. My anatomy

text contained many many more details in the overlapping chapters. The online course materials are quite lacking. The accompanying CDROM is mostly useless. If the book is required in your respiratory care curriculum, that would not be a bad thing. It works.

ok

This book was very helpful. The diagrams were great! It was an easy read and presented the information in a way that made it easy to learn and remember. I would highly recommend this book. I have referenced it several times during my program to make sense of other books.

this book was a bit hardr to reead but more fun, becauase of the pictures, it actualled helped quite alot because it had the basic and advanced pulmonay anatomy and physiology,m

Comprehensive, well written, covers Cardiovascular A & P, ECG's, Cardiopulmonary Pharmacology and more. A Gold standard for Resiratory and CVT students,

Kindle edition does not work with Windows 8. Very disappointing since I need it for school. Hopefully this will be corrected. It is extremely inconvenient.

Thsi book explains a lot of details of the cardiopulmonary physiology. This was very helpful for my tests. I found some new details that I did not know.
