Baby Animals Coloring Book (Dover Coloring Books)

Synopsis

Did you know that young animals have their own special names? Baby cats, for instance, are called kittens, and a joey is a baby koala. Pups can be the youngsters of adult dogs or seals; and cubs have tigers, lions, wolves, or pandas as parents. Nature lovers (and coloring book fans of all ages) will enjoy coloring the adorable creatures in these 30 portraits of baby animals. Included, among others, are scenes of four little piglets staying close to their mom, two white-tailed fawns grazing on a hillside, a pair of beagle pups resting under their father's attentive eye, and two young calves being watched over by mother giraffes.

Customer Reviews

In addition to illustrating books for Dover, Ruth Soffer has also done work for other major publishing houses. An artist specializing in natural science subjects, she lives in Brooklyn, New York.

Dover's "Baby Animals Coloring Book" is an excellent choice, but not for beginners. The pictures are more detailed than other Dover Coloring Books and might be too complex for little ones to color. The pictures are well drawn and very appealing. Printed on nice quality paper, the pages are not so flimsy that markers will bleed through - unless a child holds the marker in one place for a long period of time. Each picture has a brief paragraph at the bottom of the page naming the species of baby

animal and giving some information about that animal. This is particularly helpful for some of the less familiar baby animals that are included in the coloring book. Thank goodness for and Dover Coloring Books! It is almost impossible to find coloring books in the stores that are not devoted to princess-themed or movier spin-offs, so the 4 for 3 promotion available on most Dover Coloring Books is most welcomed. If you are looking for some nice quality coloring books, I urge you to look at Dover's "Baby Animals Coloring Book" and others available on .

This is a super cute coloring book for people of all ages! The pictures are very realistic and are on most of the page. At the bottom of every page there is a short description of every animal. The only downfall to this book is the pictures are printed on both sides of the page so be very careful using anything other than colored pencils in this book.

although this isn't really for adults, I got it for my mom, who is stroke victim in a wheel chair. She loves to paing & color with colored pencils. This gives her cute baby animals to color, and with that a smile.

Got this because of reviews. Thought it might be too childish but very appealing to adults also. Many types of animals not just barnyard. I'm starting into the 'adult coloring' craze and find too many of the books to be a maze of small spaces much too tedious to enjoy. Have ordered several of the Dover coloring books and very pleased with them.

First, the pages of this coloring book are white, not that usual coloring book "newspaper" like paper. And the pictures are really nice...plenty of detail to be colored but not so much that it would overwhelm a child. I bought this for a 5 y.o. who loves baby animals, and she is very happy with it. I highly recommend the Dover coloring books!

I purchased this book for each of my grandchildren. Dover Press can not be equaled for child endeavors in art and science to boot. I am a retired teacher and I purchased Dover products to enhance themed units. The kids loved the quick synopsis and each page with enticing illustrations. The economics have purchasing their products can't be beat!

Did not think this was a good book at all pictures are just ok will not buy anymore of this name

The baby animals are well demonstrated and makes you want to draw.
