## Customer Reviews

luv it.

This is my second book of doodle creatures by this publisher. As with the Zifflin line of <sup>TM</sup> books, so far each of the books by Okami Books has had a different illustrator. The artist for this book is Irvin Ranada and the theme is doodle creatures in outer space. This is my second book by this artist (the first was from another publisher) and I appreciate his style of artwork. The designs are so cute and quirky that just looking at them makes me smile. They are very detailed to color and some have intricate and small spots as well. I especially enjoy the picture of the alien cats in outer space but there are so many I enjoy, I know that I will spend hours with this book. This is the style of book that will appeal to people with a quirky sense of humor who also like drawing many small elements on each page. There is a fun sense of abandonment to reason when I color doodle creatures. I can use any colors or medium I wish <sup>TM</sup> making it cohesive through

color or giving it a feeling of dissonance or disharmony through color as well. This is what I experienced while coloring in this book and testing my coloring medium on the paper: 40 Detailed Doodle Creatures designs in outer space. Printed one side of the page. Paper is typical of CreateSpace: white, thin, slightly rough and non-perforated. Designs do not merge into the binding and there is plenty of room to cut out pages if you choose to do so. The designs have a framing line at the outer edge. Glue Binding. Alcohol-based markers bleed through the page quickly. Water-based markers bleed through in spots. Gel pens and India ink pens leave shadows on back of the page. India ink can bleed through if you apply heavily or multiple coats. Coloring Pencils work well with this paper. I found that I could layer the same color for deeper pigment or multiple colors and I could blend easily using a blending stick. I tested both oil and wax based pencils. I also found that hard lead pencils leave dents through the paper. I like to use a blotter when working in the book. I use a page of card stock or several sheets of heavyweight paper under my working page. It keeps seeping ink and marring dents from ruining the pages below.

This book is printed well. The designs are amazing and well thought out. The paper it's printed on seems to be good quality. We will buy from this artist again.

My friend's favorite part of her gift bag!!

A gift

This book is fantastic - perfect for just color relaxing (a word I just made up) while watching a little tv at night. I love space and even work in the industry. This book is a combo of space and crazy. The pictures are so fun and I don't have to spend any time trying to make sense out of what I am drawing because they really aren't meant to make sense :-). My 6 year old daughter begs me everyday to help me color "Momma's space book," but nope - this baby is mine! The kids have their own coloring books similar to this one, but they like this one much better. ONLY DOWNSIDE - don't show your kids or they will keep nagging you about how much fun it looks to color and how we should all share and take turns...

I love this really really strange book. None of the images make sense and that's my favorite thing to color. I personally love the paper and I check everyday for new releases from this publisher

the designs are so much fun, and because they're of "outer space" I don't feel any constraint to have to color things "realistically" (which may not be a problem for all, but for me its nice to have that extra creative flexibility). I look forward to adding more of this series to my collection.
