Customer Reviews

Jordan Hetrick writes very good and concise instructions, covering every phase of flight from set up to pack up and fly another day.

A Must Have for the GoPro Drone!The Karma is my first drone and this book covers it all- I learned

more than I even knew there was to learn. I knew there was a learning curve with drones, but the author covers topics that I didn't even know were important. After reading this book, I feel 1000% more confident with my aerial filming, photography and editing skills. All of the topics are really well illustrated and organized. I'm very happy I bought this book!

While some of the book was derived from earlier GoPro books, the integration of the drone information helped me. The video editing information is easier to digest than earlier GoPro iterations. I would have liked more detail on the Quik app, but overall, I found this book to be the best and most focused I've read from Jordan Hetrick.

Well-written guide to getting the most out of your Karma. Straightforward style, good illustrations. I love my drone and this book has added immensely to the fun.

Great book, with good illustrations. The chapter on getting creative shots are particularly good.
