Customer Reviews

I purchased this book to help me prepare for my COA exam. It was broken down into the chapters that JCAHPO has on the exam, the heaviest weighted chapters having the most test questions. I feel that by using this book along with the 9th edition of The Ophthalmic Assistant: A Text for Allied and Associated Ophthalmic Personnel helped me pass the COA on the first try. This manual phrased the questions almost identically to the questions on the actual exam, and even better, has an

answer guide at the end of each chapter explaining why the answer is correct. You can't go wrong buying this book when preparing for the exam.

Some of the question found in the book touched on topics that I did not see in my text book and I find myself researching them and continually learning things I should have known. Any student would be amiss not to purchase this book if they need to do their certification soon. I personally feel that this book is worth every penny that I paid for it and more. This is a must have study guide and I will give another review of this book as soon as I get my certification.

This book was as amazing help for my COA. A lot of the questions in the book were similar to the style questions on the exam. A must get. This helped me pass on the 1st attempt.

Great study tool. I found this book to be similar to the actual test in that some questions were easy and some were harder. I passed my COA so I'm pretty happy with my purchase.

This book needs to be a study tool as you prep for your COA exam. Awesome book.

Perfect text for test taking

Just starting out. This does not give me enough information. I have to buy another book to understand this one, maybe then this will be helpful. At least I hope so.

Awesome book to help you study for your COA. I love how when it gives you the correct answer at the end of each chapter it explains why it is the correct answer.
