This book is perfect for my beginning special needs 9 year old who is at least 2 years delayed. I think an average 4 -5 year old would be great with this. This book would not require any answer key as the instructions are very straight forward. Access to a piano is nice, but not necessarily required. This series is wonderful as there is a lot of review. The fly-leaf gives a clear idea of what is covered, and subsequent books spiral over old material. I've used this several times (with 5 kids) and have not been disappointed.

This music theory book teaches music theory as it relates to the piano. This took me by surprise. Nothing I read about this book indicated that fact. I am teaching the recorder, so would not have chosen this book had I known.

Loved using these with my kids. Simple to figure out even if you don't know music theory yourself.

I don't know if I love it, but had to have it for school.

Good

Textbook for music class. The book is fine, but it only receives four stars because it's for school! :)

Great for kids

My son is 8 and has never played piano before. We also used a work book along with private lessons. He can now read notes!
