## Customer Reviews

Dana Oakes, BA, RRT-NPS. Mr. Oakes is currently an Educational Consultant and was formerly Director of Respiratory Care, VA Medical Center, Washington, D.C.; Educational Coordinator/Instructor, Respiratory Care Department, Children's Hospital National Medical Center, Washington, D.C.; and Director of Clinical Education, Respiratory Care Program, Columbia Union College, Takoma Park, MD. Mr. Oakes has been in the Respiratory field for over 30 years and has over 14 years of teaching experience including one-, two-, and four-year advanced Respiratory Care programs. Sean Shortall, RRT-NPS, RPFT. Sean is the Clinical Educator of Respiratory Medicine Department at Eastern Maine Medical Center in Bangor, ME. He formerly worked as a respiratory care practitioner and critical care educator at Dartmouth-Hitchcock Medical Center in Lebanon, NH. He has been in the Respiratory field for over 21 years, has co-authored several respiratory articles in national respiratory and nursing journals, and speaks frequently in the U.S. and Canada on Advances in Mechanical Ventilation.

All the pocket books by Dana Oakes have information that is invaluable. Anyone taking care of a person on a ventilator should have this book.

I ordered the Dana Oaks Ventilator Management book as kind of a back up reference for when I go to clinicals next month. I wasn't too sure what book to get, so I got this one and a different Dana Oaks book. This one is great! Almost a complete review of everything we have gone over so far in school, and lots that we have yet to cover. Thanks a lot!

This book is a great reference to carry while on clinicals. It truly helped me with my vents and helped me understand them much better.

This pocketbook is ideal for students who want a condensed version of material they are learning in school. I found it very helpful because important concepts are highlighted and given in coloured tables, formulas, graphics are included in colour and troubleshooting tips. Excellent. I will probably use it in clinical year too.

good quick reference

Excellent book for the money. It is a standard in the Respiratory Care field. I wouldn't think twice about buying this for any respiratory therapist or resident in training. Its a great pocket guide.

this is a good reference tool. print is small and the book is stiff and hard to keep open....maybe on rings like a notebook.

This book is a great tool! It should be a required book for all respiratory students and nurses going into the health field.
