THE LUPUS SCANDAL!! HOW A HORRIFYING DISEASE CAN BE EASILY CURED IN 7 WEEKS WEEKS WITH HIGH DOSES OF VITAMIN D3

Synopsis

I recently wrote a book about my self experiments with extremely high doses of the sunshine hormone Vitamin D3. AND in my research I always suspected that high dose D3 should quickly cure Lupus. The book recently recieved a review from a Lupus sufferer which I post as follows:I am very fortunate to have found this ebook. I had a Vit D test on July 25, 2013 and my test number was 18. It did not surprise me because I have been at these low numbers for years and did nothing about it. My doctors were never concerned about it and neither was I since I did not know better. I am female and 54 years old. In 1997 my body started falling apart and fifteen doctors and thousand of dollars spent trying to find a solution to my medical problems. I was referred to different doctors for different problems. I have discoid lupus on my scalp which caused quite a bit of hair loss, horrible skin breakouts and lesions on my scalp, face, chest and arms. I started loosing my eyegrows and eyelashes. Talk about severe stress. I was at stage 5 adrenal fatigue, take thyroid medication and of course medication for the lupus problems. I could not heal with the different medications I took or the healthy foods I ate. I became allergic to the sun. If I did go outside I would break out in welts on my exposed skin. I found the e book and started taking 10,000 of Vitamin D3 with the K2 the following Monday. Four weeks later I had another blood test and my Vitamin D level was at 58. I am now seven weeks taking my Vitamin D3. My eyelashes, eyebrows and hair have started growing back in. I still have a way to go growing my scalp hair back in though. All of my welts have healed!! Nothing I did before would heal my skin. My skin is now very supple, it feels as if I have tons of lotion on. I had a root canal done two weeks ago and was put on penicillin for 10 days (endodontist said I had this problem for over a year) and for 5 of those days I stopped the Vitamin D3. My entire body started hurting again. I felt so bad. I immediately started my vitamins again and I was back to my old self again the next day. I am now able to spend time out in the sun again. It feels so good. Last week I spend time weeding my garden and got bit by several mosquitos. Usually these bites are very uncomfortable and I scratch my skin until it bleeds. NOT this time. I was bit and I did not feel any discomfort whatsoever. My skin never swelled from the bites nor did they itch. For me that was amazing. I have a doctors appointment soon and I will ask for a thyroid test and d level test to see where I am at. I want to get off of my medications. I have been wanting to up my Vitamin D3 to 20-30,000 UI. I still have a way to go. I have a bone spur and some other medical issues I want healed. The vitamins I now take are Andrews Lessmans Vitamin D3-2000UI (10,000) K1/K2 (1000), Calcium(2500) Magnesium (1200) per day. Again, thanks for the valuable information provided to us. I am planning to put my husband and brother on this program. They both need it! **My present doctor is learning as much as he can from me. I am his only patient that he knows of taking this

much Vitamin D and he has noticed the huge improvement. I am expect that it will work for you..if you just give it a shot.

Customer Reviews

This is a very eye opening book on Lupus and possible cures for the disease. Read not only this book for natural cures and dietary foods for healing your own body.

I like the ebook. I'm taking D3, K2, and K1. My Lupus turned out to be drug induced. When I stopped taking that med, it went away. However, I it turned out that I had Lupus and another skin condition at the same time. It's too early for me to say how it's working.

Great book keep an open mind

THANK YOU VERY MUCH!

Poor

It's best to read Abram Hoffer's Epic Work, Orthomolecular Medicine for Everyone before reading Jeff's book. Dr Hoffer (PHD/MD) and Dr Linus Pauling (2x nobel) prize winner in medicine founded the sciences of Orthomolecular Medicine , Orthomolecular Nutrition, and Orthomolecular Psychiatry over 30 years ago. Orthomolecular medicine uses high doses of Vitamins, Minerals, amino acids, enzymes, antioxidants, and other orthomolecular substances and nutrition to treat Chronic and terminal diseases. Hoffer used doses of 10k to 20k IU of Vitamin D3 to treat MS, and Lupus suffers, but he was primarily a psychiatrist who was forced to start treating chronically and terminally ill people as the MD care was so bad. Jeff has rediscovered a lot of the work and pushed the vitamin d levels to much higher than Hoffer and other Orthomolecular MDs did. The current MD treatment for lupus is chemo, steroids, failed kidneys and death. This book, along with Hoffer's books on Orthomolecular Nutrition and Medicine are must reads for all Lupus sufferers. Kudos to Jeff. Low Dose Naltrexone Therapy may also be of benefit to Lupus , MS and Crohns, and Cancer sufferers.

Disclaimer: Did not read the book. Point well taken Vitamin D3 can help a lot of people especially with auto-immune diseases. I have lupus (SLE) and I do take D3 supplements... probably not enough. But I had to jump in here to say if you take lots of Vitamin D3 and then you no longer test positive for Lupus (and all your symptoms go away)... you didn't have Lupus. I will not say we will never know more about it or that we will never have a cure- but this book is misleading. For the price it's worth a look through for good info on Vitamin D3 (I'm guessing.) PS: I hate when people rate products they have not purchased or read/used. I just felt compelled- as someone struggling with the horrors of lupus.

There's good information in this book, but it is very painful to read. The author just writes what he's thinking when he's thinking it. There is no table of contents because there is no organization to the book. Yes, it's only \$2.99, but the author could put a little effort into organization and editing out of respect for his readers. Also, the title is very misleading since Lupus is only mentioned a few times in the book, and usually only when lumped together with other autoimmune conditions.
