Age Range: 5 - 6 years

Grade Level: Kindergarten and up

Customer Reviews

Grandson picked this right up and is always bringing you the cards to test him. Just started school so they are great.

Great Quality\ . Fast Ship! Awesome Price.

My order came fast and the price was very cheap. These cards were perfect for jump starting my kids over the summer!

These cards are very easy to use!! They have clear bright, easy to see colors. It was a worthwhile purpose. The answer key on the top of the cards didn't bother me in the least.

The quality of this product was First class. High quality, thick cardstock, easy to read print. A

product that will last through at least one child learning their basic fact and likely the second child as well.

Every combination of cards my 2nd grader needed, less than half the price of local educational kid stores locally, plus no hassle at the malls and no missed time with work or family. 90% of what we need for our large family can be dropped at your door, and the prices are even better when you consider the time that is saved which translates into more money since time=money. Glad to have behind every purchase I make. Now, if you start selling cars, we'll be totally covered. Happy Holidays to all the Big A company employees!

well made & so glad I got them

disappointed that inquiry to company advertising their product was misleading.teacher requesting math facts up to and including "20". company representative stating "yes, cards include "fact family" of the number 20". that was not the case.we were looking for $2+18=20$; $5+15=20$; $10+10=20$; etc. which was exactly what i stated.i could've purchased the same cards locally from numerous stores for \$1 just about anywhere.eventually, i located what i needed from A Beka (teacher & homeschool supplier).
