Customer Reviews

"Spot is one of the essential experiences of childhood." -Parents Magazine --This text refers to the Paperback edition.

Eric Hill (www.funwithspot.com) left school when he was 15 and took up cartooning while working as a messenger at an art studio. He created *Where's Spot?* as a bedtime story for his two-year old son. It was published four years later, and the rest is history. Eric Hill passed away in July 2014.

My toddler loves this book so much we had to buy a second copy of it. A few of the flaps came off of our first copy out of sheer excitement of trying to find Spot, so we ordered a backup copy. When it arrived in the mail, our now 18 month old squealed, grabbed it and has asked us to read it at least twice a day since then. It's pure joy on the little guy's face when everything behind a flap tells him "no" and then he finally finds Spot at the end. It's short enough that it keeps his attention and short enough that it's tolerable for parents that might have to read it over and over and over.

Where's Spot is a lot of fun to read with little ones. Spot's mother is looking everywhere for Spot, who needs to finish his dinner, but he's hiding! She looks everywhere she can think of, finding lots of other animals along the way. It's a great book for working on animal identification (and animal noises). It's short and not annoying to read over and over. Lift-the-flap books are always popular with little ones. However, rip-off-the-flap is even more popular, so I definitely recommend reinforcing them with packing tape.

I'm a speech therapist in early intervention, and my toddlers love this flap book. Great simple vocabulary for teaching animal names and location words.

When my kids were toddlers, we had lots of the Spot books. They were always a favorite and often the chosen book at bedtime when I told them to go choose a book for us to read. Now, I am buying them for the next generation of toddlers in our family. Your little ones will love them!

I had never seen this charming book as a board book. The doors for Spot are not very sturdy so I'm reluctant to give it to a toddler. It seems better to be read together as a before bed story with the mother or father opening the doors with their child.

A favorite of my children and I just purchased for a neighbor's new baby. The lift a flap and cute little puppy are very engaging. I think that all very young children will love this book

I remembered this book from when I was a child, so I bought it for my LO. She's 10 months old and really into lift the flap books, so she loves this book, but the flaps are just glued onto the page, and they're super easy to rip off, which was a huge disappointment.

Excellent to teach basic concepts and the pre-school and K age love the suspension of lifting up the flap to see what's underneath.
