Lupus (The Facts Series)

Synopsis

Lupus is a disorder in which the body's immune system attacks itself, culminating in disease which can affect multiple organs, including the skin, joints, heart, lungs, kidneys, and central nervous system. Lupus currently affects about 30,000 patients in the UK, 500,000 in the United States and tens of thousands throughout Europe. Whilst there have been great advances in research into the genetic background of lupus and new interventions such as stem-cell transplants, there is still a surprising lack of information available for patients, carers and their families. Written by the former President of the British Society for Rheumatology and the current co-director of the Lupus Center of Excellence in Pittsburgh, USA, this new edition of *Lupus: The Facts* reflects major developments in our understanding of the causes of lupus.

Book Information

Series: The Facts Series

Paperback: 112 pages

Publisher: Oxford University Press; 2 edition (March 27, 2008)

Language: English

ISBN-10: 0199213879

ISBN-13: 978-0199213870

Product Dimensions: 7.5 x 0.4 x 4.9 inches

Shipping Weight: 3.5 ounces (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars 1 customer review

Customer Reviews

"...a concise book, well written and providing the essential information patients need to know. The book answers a lot of patient's questions. Without being overoptimistic, the book maintains a positive attitude and I feel it will be helpful to patients to understand and cope with their disease."--I. Hoffman for Rheumatology

David Isenberg is Academic Director of Rheumatology at the Centre for Rheumatology at University College London, UK. Susan Manzi is an Associate Professor of Medicine and Epidemiology and

Co-Director Lupus Center of Excellence at the University of Pittsburgh, USA.

Great book, was recommended by my Specialist who worked with the author. Very concise & straight to the point. Great little reference. Loved it.
